

Making the Reason for the Seasons Posters

Your WebQuest task is to make five posters. The posters will explain:

1. Two misconceptions people have about what causes the seasons.
2. The Earth's orbit around the Sun.
3. How the Earth's tilt affects the seasons.
4. How the position of the Earth as it orbits the Sun affects the season.
5. How sunlight hitting the earth affects heat during the seasons.

Your posters will explain these important concepts.

Poster requirements:

- Posters will be drawn on an 11"x17" sheet of paper.
- Diagrams and drawings will be used to help illustrate the concepts.
- Colored pencil and/or markers will be used for illustrations.
- The explanations written on the poster will be written with a #2 pencil.
- The poster will be neat and all information will be easily found.

Use your time in the computer lab to research the required information for the five posters. When done, take your time and produce neat and accurate posters explaining the reasons for the seasons.
